PROJECTS

Online Management System Of Institute
Final Year Project (Continue)

Along With my FYP partner i am developing a system useful for institute on registration of students and online attendance feature useful by the parents. It is **Android and Web based** project.

Registration System of Students
Semester 7 - Web and Android Base

By using **Android Studio** develop a Simple Application for **Student Registration** and storing all entities in in Database Using API's

Online Shopping Website
Semester 6 - PHP & HTML

Using **HTML** for front-end designed a Website which is fully Functional and stores all the transaction details in database using **PHP** as a server-side Language

Billing System
Semester 4 - PHP and MySQL

Developed A system for company That Can Check Items in there Warehouse and Generate a bill which the Costumer has Ordered

Hotel Reservation System
Semester 3 - C++

Along with My Group Members Develop a system that check the Reservation of a Client and generate its bill

Hangman Game
Semester 2 - C++

I Individually Develop a game of **Hangman** for my semester project evaluation. This Game First take entry of words according to users need and afterword randomly a word is use and then the game begin . User can just make 3 mistakes while completing the Word

Shortest Distance Calculator
Semester 1 - C++

Along with my group member we develop a system which takes input about the kilometers and the cities you want to travel and at the end it will tell you which city you will visit first and has shortest distance.

LANGUAGES

English (Professional Working Proficiency), **Urdu** (Full Professional Proficiency), **Punjabi** (Limited Working Proficiency)
